Art Unit: 1723

FIRST OFFICE ACTION

1. This application has been assigned to Technology Center 1700, Art Unit 1723 and the following will apply for this application:

Please direct all written correspondence with the correct application serial number for this application to Art Unit 1723.

Telephone inquiries regarding this application should be directed to the Electronic Business Center (EBC) at <http://www.uspto.gov/ebc/index.html> or 1-866-217-9197 or to the Examiner at (571) 272-1139. All official facsimiles should be transmitted to the centralized fax receiving number 571-273-8300.

Priority

2. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d). All of the CERTIFIED copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

Information Disclosure Statement

3. Note the attached PTO-1449 form submitted with the Information Disclosure Statement filed 21 APR 2006.

Drawings

4. The drawings filed 21 APR 2006 are objected to because of the following informalities:

- a. the following feature recited in claim 10 is poorly/unclearly depicted in the drawing figures: the input and output screw shafts have a flight depth decreasing toward the gear section.
- b. the following feature recited in claim 10 is poorly/unclearly depicted in the drawing figures: in the housing, flights are formed which extend in an opposite direction relative to the flights of the screw shafts, the flights having increasing diameters toward the gear section, and each of the flight ending between the planet wheels.
- c. the subject matter of claim 18 is poorly/unclearly shown.
- d. the subject matter of claim 22 does not appear to be shown in the drawings (37 CFR 1.83(a)).
- e. the subject matter of each of claims 23-25 is poorly/unclearly shown.
- f. reference character "14" in Fig. 2 is partially obliterated.

Correction is required.

5. Applicant should verify that (1) all reference characters in the drawings are described in the detailed description portion of the specification and (2) all reference characters mentioned in the specification are included in the appropriate drawing Figure(s) as required by 37 CFR 1.84(p)(5).

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

Replacement Drawing Sheets

Drawing changes must be made by presenting replacement figures which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments, or remarks, section of the amendment. Any replacement drawing sheet must be identified in the top

Art Unit: 1723

margin as "Replacement Sheet" (37 CFR 1.121(d)) and include all of the figures appearing on the immediate prior version of the sheet, even though only one figure may be amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin.

Annotated Drawing Sheets

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheets must be clearly labeled as "Annotated Marked-up Drawings" and accompany the replacement sheets.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

Specification

6. The substitute specification filed 21 APR 2006 is approved and has been entered.

7. The substitute abstract is acceptable.

Art Unit: 1723

8. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed (MPEP 606.01). The title should mention one or more of the features recited in claim 10.

Claim Objections

9. Claims 10, 18, and 21 are objected to for the following informalities:

- a. Claim 10, last line: replace "flight" with --flights--.
- b. Claim 18: which one of the screw shafts recited in claim 10 is "the screw shaft" referring to?
- c. Claim 21 is a duplicate of claim 20 and both claims depend from claim 11. The dependency of claim 21 should be revised or the claim cancelled. Correction is required.

Allowable Subject Matter

10. Claims 10-25 are allowable over the prior art of record.

11. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The prior art of record does not teach or fairly suggest the recited structure of the gear pump, particularly wherein, in the input and output transfer mix areas, the input and output screw shafts have a flight depth decreasing toward the gear section, and, in the housing, flights are formed which extend in an opposite direction relative to the

flights of the screw shafts, the flights having increasing diameters toward the gear section, and each of the flight ending between the planet wheels.

Conclusion

12. This application is in condition for allowance except for the formal matters outlined above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited prior art discloses gear pumps.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles E. Cooley whose telephone number is (571) 272-1139. The examiner can normally be reached on Mon-Fri. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
